

Healthy Green House Call

Make Your Home A Healthier Place To Live!

Your home should be your sanctuary, a place where you can be safe. Yet, our indoor air is often ten times more polluted than outdoor air. Most of this pollution is caused by the products you use in your home and by typical construction and decorating materials. Give your home a check up with our Healthy Green House Call! One of our healthy home experts will come to your home to show you how you can make it a substantially healthier place to live. We will walk you through the products you currently use, how to choose healthier options and what to do when a non-toxic option isn't available. At the end of your visit, you will have a chance to purchase books and cleaning products at a 10% discount. After your visit, you will receive an individualized written report detailing our findings and suggestions and containing additional resources as well as a coupon for

10% off one entire in-store purchase.

Pricing varies according to your needs.

Please call 847-864-9098 for more information.

Yes, it really IS easy being green!

Toxin-free, eco-friendly products for everyday living!SM
